

EDITOR'S PREFACE

This issue of NORTHERN STUDIES is designed to give members information on the activities of the Society plus notes on matters of related interest.

It is hoped that this bulletin will come out regularly in the Spring and Autumn of each year. Besides recording details of past activities, it will announce forthcoming lectures, conferences and excavations and act as a clearing house for information on Scandinavia and Scotland.

The Society is keen that members will take full advantage of the bulletin to express their views, news or questions about any aspect of Scotch-Scandinavian matters. If you have any items of interest please send them in.

Future issues will include more information on the resources and activities concerning Scandinavica.
